Cardiovascular Women's Summit

09–10

November 2021
16.00 - 17.30 CET

A summit for interventional cardiologists to share insights on the latest advances in interventional management of complex cardiovascular disease.

Topics will include the full spectrum of care including an overview on the Lancet commission, stenting strategy based on bifurcation lesions complexity, management of high bleeding risk patients undergoing PCI, the latest on drug-coated balloons, an overview on the EBC main trial to clinical practice, aortic stenosis disease in women and an update on patient selection in renal denervation.

A panel discussion on women in leadership roles, barriers in the cardiology workspace and how to balance family life and career is also included in the program.

Register here
